

MAFAL

TOOL SHEDS | CARPORTS | ACCESSORIES

The new definition
of metal garden houses.

ABOUT US

MAFAL is a new brand in the  family, created for those who value modern design, functionality and reliability.

It is a response to the growing demand for high-quality metal structures for outdoor use in both private gardens and company premises.

Check our website!

PRODUCT

TOOL SHEDS

Compact or extended with a woodshed, ideal for storing tools, garden equipment or bicycles. Thanks to the use of thick sheet metal (0.5 mm), the structures are resistant to corrosion, moisture and mechanical damage.

CARPORTS

Available in many configurations: open, partially enclosed, with the option of adding tool boxes, lockable storage rooms or decorative wooden panels.

ACCESSORIES

litter bin enclosures – aesthetic and durable covers to hide unattractive containers.

bin shelters – larger structures with the option of closing and ventilation.

bikeboxes – safe and sturdy storage for bicycles, scooters or sports equipment.

Here you will find metal tool sheds, carports and accessories that combine the durability of steel with aesthetics perfected in every detail.

What makes our products stand out?

First of all, the possibility of full customization - in terms of dimensions, functional layout, as well as color and type of finish. This allows every customer to create a structure that perfectly matches their needs and the style of their surroundings.

Metal with character.

Trust in BHB quality and discover a new brand that redefines the way we perceive metal garden structures. Choose modularity, aesthetics and reliability – and create a space that works for your needs.

TRANSPORT

Every month, we cover 150,000 kilometres on the roads of Western Europe. Our own fleet of vehicles guarantees the safety and high quality of transport and unloading.

You will recognize our vehicle right away! Each vehicle has a different model from our range on its door. You can monitor the delivery process at all times. We offer the option of tracking the location of our lorries with GPS, so you will know when exactly to expect it.

We have a modern fleet of 25 vehicles, all of which fulfil the EURO6 emissions standard. They have a lower CO2 footprint and emit far fewer pollutants. Sustainability is one of our priorities – after all, we produce from natural raw materials! We have over 300 transports every year. Our products are usually delivered to Germany, Great Britain, France and Switzerland, but also to other European countries. As an option, our vehicles can be equipped with a piggyback forklift, which allows for unloading in difficult locations or directly to the customer.

We strive for perfection by constantly improving our processes and investing in the latest technologies. This allows us to ensure reliability and punctuality of delivery and fulfil the expectations of even the most demanding customers. By choosing our transport, you are choosing professionalism, an ecological approach and full commitment to the realisation of your order.

Our products are delivered via a lorry. Thanks to the piggyback forklifts the unloading is fast and efficient. When ordering transport, please make sure that the delivery place is accessible to our lorry.

Vehicle details: weight of 40 tonnes, 4 m high, 16.5 m long, 2.45 m wide.

WHY IT'S WORTH

Durability for years

Thick sheet metal (0.5 mm), acrylic, coated, weatherproof.

Wide range of RAL colors

Match the color to the style of your house or garden.

PVC windows

Classic or with a mirrored pane
– for more comfort and privacy.

Wood effect

Choose a wood-effect finish: golden oak, winchester, walnut, mahogany.

Freedom of design

You can customize every product to your needs: from the wall layout, to the type of roofing, to functional details.

TOOL SHEDS
